CODEBOOK DISPLAY NOTES
PATH STUDY
EVER/NEVER REFERENCE DATA
ICPSR #36498-3503

1. ICPSR customized the display of variables in this codebook. Most variables contain a frequency table displaying value labels and unweighted counts. Some variables do not show either a frequency table or summary statistics. These are variables for which univariate statistics are not meaningful, such as CASEID and PERSONID.

2. Each variable contains the following statement:

“This variable has XXXXX valid cases out of XXXXX total cases.”

This statement describes the number of valid cases for a variable that would be used in the calculation of percentages in the frequency tables.

3. The codebook provides frequency tables for valid and missing values. The displayed percentages are rounded to one decimal place. Due to rounding, not all individual percentages in the sub-tables sum exactly to the total. Likewise, the total percentages when combined may not sum to 100%
4. Users should consult section 6.7 of the Public-Use Files User Guide for further information about Missing Values. All missing values correspond to the descriptions listed in the following table.

PATH Study Missing Value Codes and Their Descriptions

Value	Definition	Applicable data types	Applicable variable types	Description
-1	Inapplicable	Numeric, Character	Interview	This value is coded to identify items that were validly skipped on a route specific to a respondent.
-5	Improbable response removed	Numeric	Interview	This value is coded to represent improbable numeric answers provided by respondents.
-6	Unassigned PERSONID	Character	Interview	This value is coded when a new person is added as a spouse or other guardian in parent interviews for Wave 2 and beyond.
-7	Refused	Numeric, Character	Interview	This value is coded when respondents answered a question as "Refused."
-8	Don't know	Numeric, Character	Interview	This value is coded when respondents answered a question as "Don't know."
-9	Missing – Not ascertained	Numeric, Character	Interview	This value is coded when data were supposed to be collected on a route specific to a respondent but the collection did not occur due to a skip error in the instrument.
-99933	Missing due to respondent not being in previous wave	Numeric, Character	Derived	This value is coded when a value in a derived variable is missing because a respondent did not participate in an interview in the previous wave.
-99999	Missing due to data not ascertained on one or more component variables	Numeric, Character	Derived	This value is coded when a value in a derived variable is missing because data were "Not ascertained" (as described above) in one or more component variables.
-99988	Missing due to a don't know response on one or more component variables	Numeric, Character	Derived	This value is coded when a value in a derived variable is missing due to a "Don't know" response in one or more component variables and none of those variables were "Not ascertained" (as described above).
-99977	Missing due to a refused response on one or more component variables	Numeric, Character	Derived	This value is coded when a value in a derived variable is missing due to a "Refused" response in one or more component variables and none of those variables were missing due to a "Don't know" response or because they were "Not ascertained" (as described above).
-99955	Missing due to an improbable response on one or more component variables	Numeric	Derived	This value is coded when a value in a derived variable is missing due to an improbable response in one or more component variables and none of those variables were missing due to "Don't know" or "Refused" responses or because they were "Not ascertained" (as described above).

-99966	Missing due to missing data on a prior wave for one or more component variables	Numeric, Character	Derived	This value is coded when a value in a derived variable is missing because of missing data in one or more component variables from any previous wave and none of those variables were missing due to “Don’t know” or “Refused” responses, because they were “Not ascertained,” or because of an improbable response (as described above).
-99911	Missing due to an instrument skip pattern for one or more component variables	Numeric, Character	Derived	This value is coded when a value in a derived variable is missing due to items that are not applicable/validly skipped for a respondent in one or more component variables and none of those variables were missing due to the other reasons listed above.
-97777	Missing due to data removed per respondent request	Numeric, Character	Interview, Derived	This value is coded when respondents request data removal.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

Wave 3: All Participants - Ever/Never Reference Data

CASEID: Case Identification Number

This variable has 53,178 valid cases out of 53,178 total cases.

Location: 1-5 (width: 5; decimal: 0)

Variable Type: numeric

PERSONID: Participant ID

Long Description: Participant ID Number.

This variable has 53,178 valid cases out of 53,178 total cases.

Location: 6-15 (width: 10; decimal: 0)

Variable Type: character

R03M_SKIPPED_WAVE: MARKER - Flag Variable for Respondents who Skipped Any Wave

Long Description: Respondents who have skipped Wave 2 and/or Wave 3 and had completed a baseline adult or baseline youth interview prior to the skipped wave.

Algorithm: IF (WAVE1_INTERVIEW IN (1,2) AND (WAVE2_INTERVIEW = 9 OR WAVE3_INTERVIEW = 9)) OR (WAVE2_INTERVIEW = 2 AND WAVE3_INTERVIEW = 9) THEN R03M_SKIPPED_WAVE = 1; ELSE IF (WAVE1_INTERVIEW IN (1,2,3) AND WAVE2_INTERVIEW IN (1,2,3) AND WAVE3_INTERVIEW IN (1,2,3)) OR (WAVE1_INTERVIEW = 3 AND WAVE2_INTERVIEW IN (3,9)) THEN R03M_SKIPPED_WAVE = 2;
